

AMP Oil Mist Lubricating Pump

FUNCTION AND FEATURES :

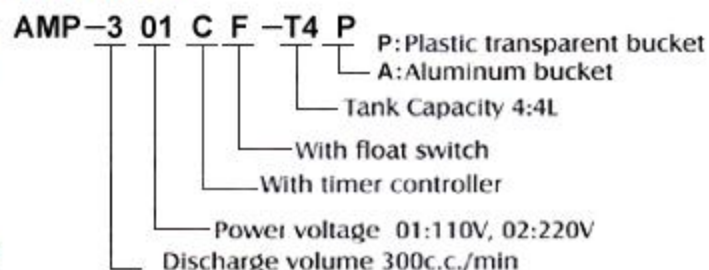

1. Extend machine life.
2. Increase the knife speed.
3. Increase the working piece precision.
4. Reduce , even no cleaning of working piece.
5. Improve the environment of factory.
6. Reduce the human body bums and environment pollution.
7. Option with liquid switch which reflect the abnormal signal.

SPECIFICATION TABLE :

The oil supplier operation by combining gear pump and compressed air , then to form the oil mist . Through micro oil mist which helps tp cooler lubrication and better cutting application. Meantime , to increase production speed and reduce machine & knife' wear.

0~300cc injection quantity can be adjustment according the requirement . To combine eith oil infection nozzle can also can control the air oil content.

SPECIFICATION :

SPECIFICATION TABLE :

Type	Discharged amount / min	Float switch	Time controller	Pressure applied	Release time	Running time
AMP-301F	0.3-0.36 L	○	X	1-7 kg / cm ²	PLC control	PLC control
AMP-302F		○	X			
AMP-301CF		○	○		1-99 min	1-99 sec
AMP-302CF		○	○			

Outside Specification

Fitting Parts : Metal vlexible hose Spray gun

SPECIFICATION TABLE :

Type	Material quality	Lenght mm
LMV-2-200L	Metal vlexible hose	200
LMV-2-300L	Metal vlexible hose	300
LMV-3-200L	Revertex hose	200
LMV-3-300L	Revertex hose	300
